

Hamit Uyar

Full-Stack Developer · 8+ Years Experience

 Istanbul, Turkey  +90 546 254 7730  hamituyar3455@gmail.com  uyarhamit.com

PROFESSIONAL SUMMARY

Full-stack developer with 8+ years of experience building scalable web applications and high-performance APIs. Specialized in Node.js (NestJS) and PHP (Laravel) backends, with strong frontend expertise in React and Next.js.

Experienced in designing distributed systems using MySQL, PostgreSQL, MongoDB, and Redis, with real-time and messaging solutions via Socket.io and RabbitMQ.

Skilled in cloud deployment and DevOps practices using AWS and Docker, with extensive experience integrating payment systems and modernizing legacy architectures into reliable, production-grade solutions.

TECHNICAL SKILLS

Backend: Node.js, NestJS, Express.js, PHP, Laravel, Prisma ORM

Frontend: JavaScript, React.js, Next.js, jQuery

Databases: MySQL, MSSQL, MongoDB, SQLite, Redis, Elasticsearch

DevOps & Cloud: Docker, AWS EC2, RabbitMQ

APIs & Integrations: REST API design, Socket.io, Payment gateways (Stripe, PayPal, Flywire, SiPay, PayTR, Turkish bank virtual POS)

Languages: Turkish (Native), English (Upper-Intermediate — Certificate from Malta AM Language School, 2022)

WORK EXPERIENCE

Backend Developer (Contract) | Saypr | May 2026 – Present

- Design, develop, and maintain scalable backend services using NestJS, TypeScript, and Laravel, supporting production applications and business-critical workflows.
- Develop RESTful APIs using NestJS and Laravel, applying clean architecture, modular design, and maintainable coding practices.
- Apply the Repository Pattern in NestJS to decouple business logic from data-access concerns, improving testability, maintainability, and flexibility.
- Work within a monorepo architecture to manage shared libraries, modules, and multiple backend services, promoting code reuse and consistency across projects.
- Work with MySQL and PostgreSQL, using TypeORM with NestJS and Eloquent ORM with Laravel for reliable and maintainable data access.
- Design and implement asynchronous communication and data synchronization workflows using RabbitMQ, enabling reliable synchronization between services and databases.
- Manage Dockerized applications and services across development, staging, and production environments.
- Build and maintain Jenkins CI/CD pipelines to automate application builds and deployments to staging and production servers.
- Manage Git repositories, branching strategies, code integration, and release workflows, supporting collaborative development and controlled production releases.
- Troubleshoot and optimize backend services, database operations, and deployment processes to improve system reliability, performance, and maintainability.

Backend Developer (Freelance) | Karnaval Radio | June 2025 – May 2026

- Designed and built a new NestJS + TypeScript API from scratch to serve mobile, TV and web platforms, replacing a legacy PHP monolith with a modern, scalable architecture.
- Implemented Prisma ORM for type-safe, optimized database access, significantly improving query reliability and maintainability.
- Led API integration efforts between the new backend and the existing PHP system, ensuring zero-downtime migration for live broadcasting services.
- Actively refactored legacy PHP code, improving performance and reducing technical debt.

Full-Stack Web Developer | Londonlst | May 2024 – August 2025

- Developed key modules for a student accommodation rental platform used by international students, including ticketing, marketplace, and payment flows.
- Integrated Flywire and Stripe payment gateways, ensuring PCI-compliant and multi-currency transaction support.
- Worked in a fully English-speaking office environment, collaborating with international colleagues on Laravel and React codebases hosted on AWS EC2.
- Diagnosed and resolved critical bugs in the CRM and payment systems, reducing reported incidents.

Full-Stack Developer | Freelance | January 2020 – January 2024

- Delivered 10+ full-stack projects including e-commerce, CRM and inventory systems for SMEs.
- Designed scalable architectures and handled end-to-end development, deployment, and client delivery.
- Designed and deployed RESTful APIs for mobile and web applications using Node.js, NestJS and Laravel.
- Integrated local Turkish bank virtual POS systems as well as Stripe and PayPal for international clients.
- Managed full cloud infrastructure on AWS using Docker for containerization and Redis/Elasticsearch for caching and search.

Full-Stack Web Developer | Ödüyö | June 2022 – December 2023

- Built new feature modules for a fintech web application handling payments and bank transfers.
- Integrated with multiple local Turkish bank APIs to process payments and transfer funds directly to bank accounts.
- Connected the platform with accounting systems including Logo, DIA, and Harmony, enabling automated bookkeeping.
- Refactored and modernized legacy Codeigniter code, making key functions reusable and cutting development time for future features.
- Stack: PHP, Codeigniter, Laravel, Node.js, React.js, MongoDB, MySQL, Socket.io — DevOps: AWS.

Full-Stack Web Developer | TD Team Aviation | April 2019 – May 2021

- Built and maintained web applications and a bespoke process management system for an aviation solutions center.
- Developed a job-tracking tool for the Solution Center team, improving internal workflow visibility.
- Stack: PHP, Laravel, Node.js, React.js, MongoDB, MySQL, Socket.io, JavaScript.

Web Developer | Dijital Bilişim | May 2018 – April 2019

- Created corporate and e-commerce websites and contributed to the development of a custom CRM system.
- Performed QA testing and bug reporting across multiple client web applications.
- Stack: PHP, MySQL, JavaScript, jQuery.

Junior Web Developer | Mobex | December 2017 – May 2018

- Developed and tested corporate websites as part of an agile team.
- Stack: PHP, MySQL, JavaScript.

EDUCATION

Associate Degree in Electronics Technology — Akdeniz University, Antalya, Turkey (2016)

English Language Course — Malta Language School, Malta (Dec 2021 – Apr 2022) · Upper-Intermediate Certificate
